### Personal Profile.

Name: Arfaja Mohamed Arfaja  
Age: 24 years old  
Marital status: Single  
Place of Birth: Tanga  
Gender: Male  
Nationality: Tanzanian  
Work: University Student (DIT), 4th year.

### Statement:

I am a youth who is a university student, 4th year. Am taking bachelor degree in Computer engineering at Dar es salaam Institute of Technology (DIT) . Even if, it looks like am not yet completed bachelor degree but am a youth who is enthusiastic of being hard worker. That's why i partook on different sectors as a doctrine to myself. I have got so much congratulations to everyone who met with me because of respecting time management means reconciling between studies and works intact. Personally, being a student isn't a hindrance but genuinely things like talents, ethics and brain capacity (evaluating huge and astonishing problems) are determining if a person is able to be employed or not because there're some employees who lacks these three tremendously denotations of work talents, ethics and brain capacity but myself I have.
